Professional Summary

Product Designer with a strong foundation in end-to-end UX and a focus on designing scalable, user-centred solutions for complex digital products. Experienced in translating user needs and technical constraints into intuitive, accessible experiences. Comfortable working across the full product lifecycle — from discovery and research through to high-fidelity design, prototyping, and developer handoff — within agile, cross-functional teams. Strong advocate for accessibility and inclusive design, with a human-centred approach to creating practical, iterative solutions which solve complex problems for all user types.

Work Experience

Inclutech - UX / UI Designer

Full time - May.2023 - August.2026 | Belfast, Co. Antrim

- Own the end-to-end design process across multiple digital products, from early discovery and user flows to high-fidelity UI and developer handoff
- Collaborate closely with engineers and stakeholders to define feasible, scalable solutions aligned with user and business needs
- Design and iterate on user journeys, information architecture, and interaction patterns for complex workflows
- Conduct usability testing, workshops, and research activities to validate design decisions and inform product direction
- Contribute to the development of reusable UI components and design patterns to improve consistency and efficiency across products
- Apply accessibility best practices (WCAG) to ensure inclusive and usable experiences across all designs
- Work within agile delivery cycles, contributing to sprint planning, design reviews, and iterative product improvements
- Integrated AI into UI design workflows, creating project-specific prompts to accelerate ideation and UI exploration while ensuring generated outputs align with established design-system components, patterns, and accessibility standards.

The Essence Vault - UX / UI Designer

Placement - December.2021 - September.2022 | Randalstown, Co. Antrim

- Designed and delivered end-to-end user experiences for e-commerce and marketing platforms, improving usability and engagement
- Created wireframes, user flows, prototypes, and high-fidelity UI designs using Figma
- Conducted user research and competitor analysis to inform design decisions and optimise user journeys
